Experts in Information Security Management

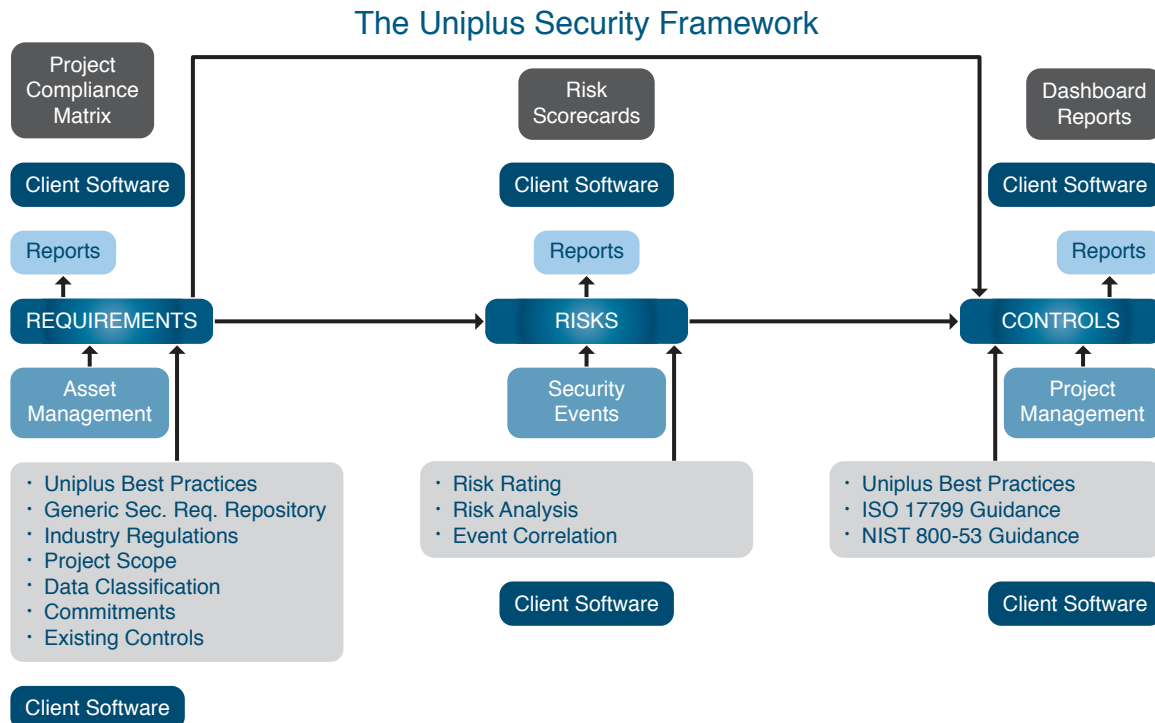

## What do we do?

Uniplus excels in providing Information Security solutions to commercial organizations, large financial institutions and Federal government agencies. Uniplus has nearly 20 years of experience providing highly secure services and applications in several of the world's most sophisticated and resilient IT environments. Call on Uniplus when you are facing any of the following common issues:

CHALLENGE	UNIPLUS SOLUTION
<b>Lack of enterprise-wide visibility into risk exposures and agility in reporting on security controls in place for compliance purposes</b>	We provide visibility into risk exposures and controls with real-time Scorecards and Dashboards
<b>Lack of mechanisms and methodology in applying security in a consistent way on different types of projects</b>	Our security framework enables the seamless integration of the security process into any project (System Development, Procurement, Risk Assessments of deployed systems, etc.)
<b>Legal liability associated with failing to prove that appropriate encryption technologies were used to protect customer, partner and employee data</b>	We implement encryption technologies (PKI, HSM, and Smart Cards) and use reporting tools that track and report compliance with cryptographic requirements in all systems
